## About Our Company

*We are a technically advanced organization, offering no array of special purpose machinery (SPM) which caters to the application needs of different industries.*

We manufacture a range of machines, including Lathes, CNC machines, Crank Shaft Machining machines, and others. Our state-of-the-art infrastructure allows us to customize products to client specifications. Our experienced technical team is dedicated to providing high-quality automotive components.

We are committed to quality and continuous improvement, adapting our product range to meet evolving market demands. We constantly pursue technical innovations and developments in our operations, products, and network. We proudly serve prominent clients such as Whirlpool International and Saint Gobain Ltd.

## Quality Assurance

*We aim towards offering premium quality products to our quality conscious clients.*

Our quality assurance policy is implemented throughout the entire production process, from raw material procurement to final packaging. We believe that increased demand and improved productivity result from supplying high-quality products to the global market. Every process is thoroughly checked, allowing for analysis and development of various aspects of the final product.

Our market success is a direct result of our workforce's dedication and meticulous approach.

Their expertise and efficiency enable a meticulous approach. Their expertise and efficiency enable us to offer premium products. These technocrats continually seek innovative techniques to enhance product features and ensure optimal client satisfaction.

# Product Profile

Established in 1990, we are a leading manufacturer and supplier of special purpose machines, precision-engineered machinery, and hydro-electric based special machines in India. Our product range includes various lathe machines (Skoda, Centre, Bombay), CNC machines (Plasma cutting, VTL), crankshaft milling machines (GFM, Boehringer), HMC machines, and turning center machines. All are built using premium quality raw materials for long working life and are available in automated and conventional designs.

We specialize in reconditioning and overhauling all types of machines, including universal multipurpose armature machines, automatic mica under cutting machines, surface wheel lathes, under floor wheel lathes, all types of lathe machines, loco transformer oil filtration plants, axle journal & burnishing machines, axle turning lathes (copying turning & CNC turning), and conversion of general machines to CNC. We also offer machine repair, reconditioning, and AMC services for all types of EDT cranes. We provide tool room accessories and hydraulic system maintenance as well.

Our in-house design and fabrication facilities, along with a rich vendor base, enable us to provide technologically advanced machines and equipment. Located in Chinchwad, Pune, with a rented workshop and office,

we have 18 years of experience successfully reconditioning CNC and milling machines.

Under the leadership of Mr. Santosh, we are committed to continuous improvement and innovation, leveraging our industry experience, manufacturing expertise, and R&D knowledge. Our precision-engineered machinery serves various fabricating and allied industries across India.

# Cast Iron Surface Plate Scrapping

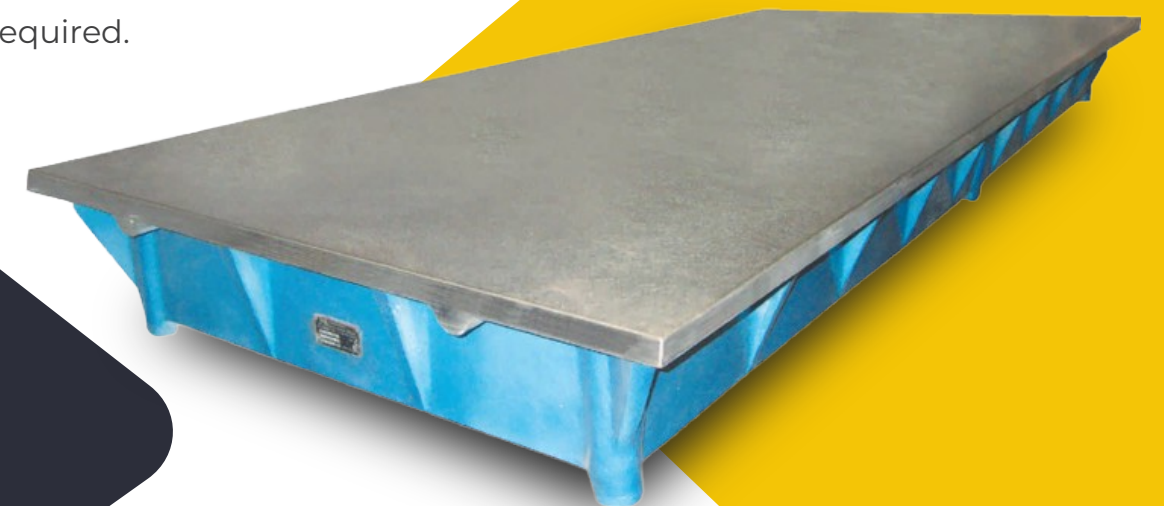

***We provide services for scrapping of Cast Iron Surface Plates of different sizes with NABL Accredited Calibration certificates.***

***We provide optional Accessories like***

1. MS fabricated stand with leveling provision
2. MS cupboard-type stand with leveling provision
3. T-Slot, Grid Slot, and Taped holes are provided as required.

## ***Salient Features:***

1. Made from close grained Cast Iron of Grade FG-220 as per IS:210
2. Flatness accuracy as per IS: 2285-2003 and hand-scrapped finish
3. Stress relived after rough machining
4. Hardness between 170 to 22 BHN
5. Inspection by high precision level or Electronic Level

# All Types Of Spare Parts

*Spare Parts for HMT / Kirloskar / BFW Machines*

We provide all types of machine spare parts such as Lead Screws and Box Nuts, Racks and Pinions, Couplings and Brackets, Spline Shafts and Clutch Shafts, All types of Gears and Spiral Bevel Gears, Clutch and Clutch Plates, Worm Nuts and Bushes, etc.

*Spindle*

*Ball Screw*

*Spur Gears*

*Spiral Bevel Gears*

*Worm Nut & Bushes*

*Clutch & Clutch Plates*

*Spline Pinion & Clutch Shafts*

*Bearings*

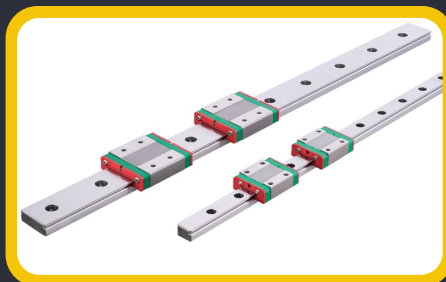

*Levers & Plunger Pump*

*Box Nuts*

*Couplings & Brackets*

*LM Guideways & Blocks*

# Our Workforce Personnel

01. *Technocrats*
02. *Engineer*
03. *Management*
04. *Skilled & unskilled laborers*
05. *R & D personnel*

Our diligent team encloses productive skills and technical knowledge. The attainment of proficient members has helped us in fabricating superior machinery. Our team is the biggest asset of our company and every effort is made for the development of their overall personality.

## Some Of The Features Of Our Range Include

1. *Cost effective*
2. *Simple in operation*
3. *Temperature resistance*
4. *Abrasion resistance*
5. *Trouble free performance*
6. *Durable*

# Why Us?

---

Some of the reasons why our clients have put their trust and hold in to us are:

- 1. Robust infrastructure**
- 2. Customized solutions**
- 3. Competitive Prices**
- 4. Talented & efficient Workforce**
- 5. Estimated lead time of delivery in 15 days**

## Client Satisfaction

---

We work in close coordination with our valued customers to offer them technically superior machining equipment as per their specific requirements. To ensure prompt delivery services, we identify with the needs of our valued clients & provide them value through information & technical support. Some our esteemed clientele is mentioned below.

## Our Clientele

---

1. VTL (CNC), Premier Automobiles Ltd, Mumbai-Pune Road, Chinchwad.
2. HMC Dumdum Wall & Bearing Company Ltd, Dumdum, Kolkata.
3. Bakelite automotive Glass Bending Fixture, Saint Gobain Ltd, Bhosari, Pune
4. Various Types Heavy Duty Special Purpose Machines, HYT, Pune
5. Hardness Testing Robotic Machine, PARI, Pune.
6. 300 Tone Heavy-duty conventional Press Machine, Whirlpool, Ranjangaon, Pune.
7. Retrofitting of Lathe, Mac tools, Pirangut Dist Pune.
8. VMC Machine Star Enterprises bhosri MIDC.
9. Turning Center CNC Akanksha Precision chakan M I DC.
10. Floor Boring machine Navpreet engineering urse Maval pune.
11. Double coloum VMC Shree Sai Enterprises Dehu Road, Pune.
12. Huwa VMC Kolhapur Auto Gokul Shirgaon MIDC, Kolhapur.
13. Leadwel VMC Mantri Metals Shirol MIDC Kolhapur.
14. SPM (Facing & Centering ) Mahindra CIE Ambethan Chakan.
15. Makino HMC John Deer Sanswadi, Pune

# Our Services

---

We provide our clients with services such as reconditioning of machines Retrofitting Services and total maintenance service. Some of the machines reconditioned by us are:

1. *Machines shifting services ( End to End service)*
2. *VTL & VTC Machines*
3. *HMC Machines*
4. *Boring Machines*
5. *Hydraulic and Mechanical Press Machines*
6. *Hobbing Machines*
7. *All heavy and Small Machines reconditioning and maintainance*
- 8.

## Research & Development

---

We emphasize on research & development to upgrade ourselves in both technology & industry knowledge. Our team includes experts in the field of engineering, software & service technologies. They constantly perform market survey to track the changing requirements of the allied industries. Further they also keep a close watch on the technology & ensure to keep our team abreast with the latest production methodology.

Our eminent quality of machineries is at par with both domestic & overseas standards.

Our R & D personnel are engaged in finding ways to upgrade our facilities & conduct exhaustive research & market study. Based on all this information, they come up with suggestions & strategies that are meant to improve our production methodologies in terms of quality & quantity. This specific wing enables us to produce quality goods & increases our presence in industrial

# Payment Mode:

---

In order to have hassle free transaction we offer our clients the following payment modes:

1. *Money Transfer through Bank*
2. *Demand Draft*
3. *Cash*
4. *RTGS*
5. *NEFT*

Some of the services we provide:

## Installation Training

---

We provide our clients with handling and operational techniques of machines so that the machinery has better shelf life. This increases the machineries reliability & cost effectiveness.

# Trouble Shooting

We undertake total maintenance of all our machineries if the machines have got any technical errors; the servicing is done with total client satisfaction of our clients. Once we deliver the product, we do take care of the post sale services even as we know that our clients need guidance on various funds for using the product
